

Next Generation

HEALTH INTELLIGENCE

Turn health data into personalized action.

Vascuscreen × Fitness & Wellness

A new on-site wellness experience designed to engage members, generate revenue and connect health insights with the services your facility already provides.

HRV · Vascular · HRV
Real-time wellness signal

Your members want more than a workout.

They want to understand their health.

Today's health-conscious consumer is increasingly focused on how they feel, perform, recover and age. Vascuscreen adds a new layer of health intelligence to the fitness experience — giving participants objective wellness information that can help guide more personalized conversations around fitness, recovery and lifestyle.

01 Train → 02 Measure → 03 Understand →
04 Personalize → 05 Improve

*The fitness center becomes more than the place for members to exercise. It becomes a destination for **understanding and improving their wellness.***

A powerful and insightful wellness assessment.

Delivered where people already focus on their health.

Vasuscreen is a non-invasive **FDA cleared** diagnostic screening platform designed to provide participants with deep meaningful wellness data insights in minutes.

01

Vascular

Insights related to vascular function and circulation.

02

Autonomic

Insights related to autonomic balance and nervous-system activity.

03

Microvascular

Insights related to peripheral and microvascular circulation.

04

HRV

Heart-rate variability and related wellness insights.

• Non-invasive • Convenient • Data-driven • Designed for preventive wellness

[WATCH VIDEO](#)

Built on Two Decades of Science

Advanced vascular & autonomic health assessments — *clinically validated.*

Providing insights that support earlier recognition of physiological changes associated with chronic disease risk — now brought into the fitness and wellness environment.

01 —

~20 *years*

Of technology development behind the platform.

02 —

~12,000

U.S. deployments to date across care settings.

03 —

13

FDA 510(k) clearances underpinning the platform.

04 —

Multiple

Peer-reviewed publications supporting the science.

Academic & Medical Institutions

University of Miami · University of Campinas (Brazil) · MIT Pune (India) · SP Botkin Hospital (Russia)

Used Across Specialties

Primary Care · Cardiology · Neurology · Vascular Medicine
· Endocrinology · Podiatry · Preventive Medicine

Results are intended to support clinical decision-making, patient education, wellness planning and referral discussions — and should be interpreted by qualified healthcare professionals.

Assessment Categories

What Vascuscreen helps *to identify.*

A fast non-invasive screening assessment platform that analyzes multiple physiological parameters — supporting the identification of physiological indicators associated with a wide range of conditions.

01 · Vascular

Vascular Health

Identifies indicators associated with:

Peripheral circulation abnormalities · Peripheral artery indicators · Reduced arterial compliance · Endothelial function · Impaired microcirculation · Reduced blood flow to extremities · Vascular aging trends

02 · Autonomic

Autonomic Nervous System

Identifies indicators associated with:

Autonomic nervous system balance · Sympathetic overactivity · Reduced parasympathetic activity · Heart-rate variability (HRV) · Physiological stress response · Impaired autonomic regulation

03 · Neuropathy

Neuropathy & Nerve Function

Identifies indicators associated with:

Sudomotor function · Small-fiber nerve function · Abnormal sweat-gland activity · Peripheral neuropathy indicators · Diabetes-related nerve dysfunction · Early autonomic nerve indicators

04 · Cardiometabolic

Cardiometabolic Health

Identifies indicators associated with:

Metabolic dysfunction indicators · Insulin-resistance indicators · Cardiometabolic risk patterns · Physiological stress associated with obesity · Vascular patterns associated with diabetes · Autonomic patterns associated with metabolic syndrome

05 · Preventive · Wellness

Preventive & Wellness

Helps evaluate:

Overall vascular wellness · Physiological aging trends · Recovery capacity · Stress adaptation · Cardiovascular wellness · Lifestyle-modification progress · Exercise-program effectiveness · Wellness-intervention outcomes

06 · Risk Patterns

Common Risk Categories

Provides insights associated with:

Cardiovascular disease risk · Peripheral artery risk · Diabetes-related complications · Hypertension-related vascular changes · Metabolic syndrome · Obesity-related physiological stress · Lifestyle-related health risks

Don't just give members data. *Give them a path forward to improve their health.*

01

Screen

Member completes their Vascuscreen wellness assessment.

02

Understand

Results provide personalized wellness insights.

03

Connect

Insights can relate to relevant fitness and wellness offerings available at the facility.

04

Act

Members can choose programs, services and products aligned with their wellness goals.

05

Reassess

Future screening events create opportunities to track changes over time.

One assessment can become the beginning of an ongoing wellness journey.

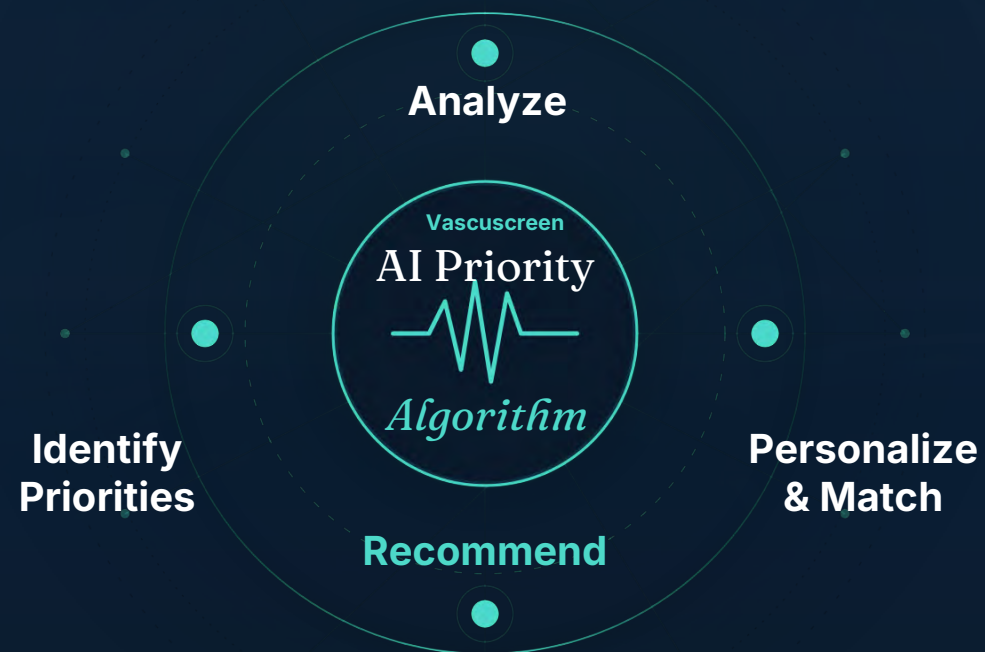

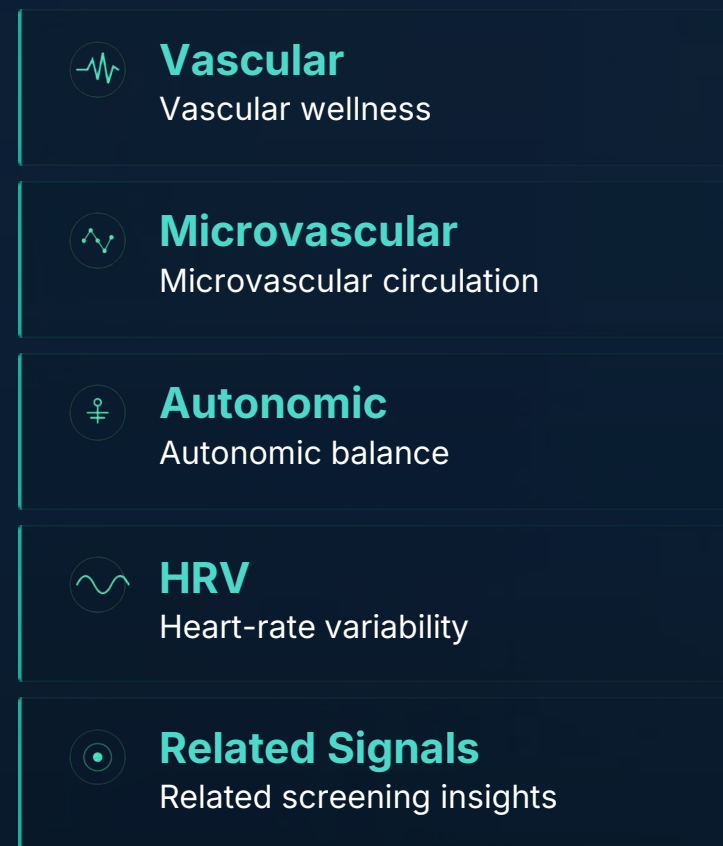

Vascuscreen Intelligence Engine

Data is only valuable when you know *what to do with it.*

Vascuscreen's AI Priority Algorithm transforms screening insights into personalized wellness priorities and actionable next steps.

01 — Screen

Wellness data report streams in.

Turning complex wellness data into understandable, prioritized information.

03 — Act

Personalized next steps.

From *"Here are your results"* to *"Here's where to focus."*

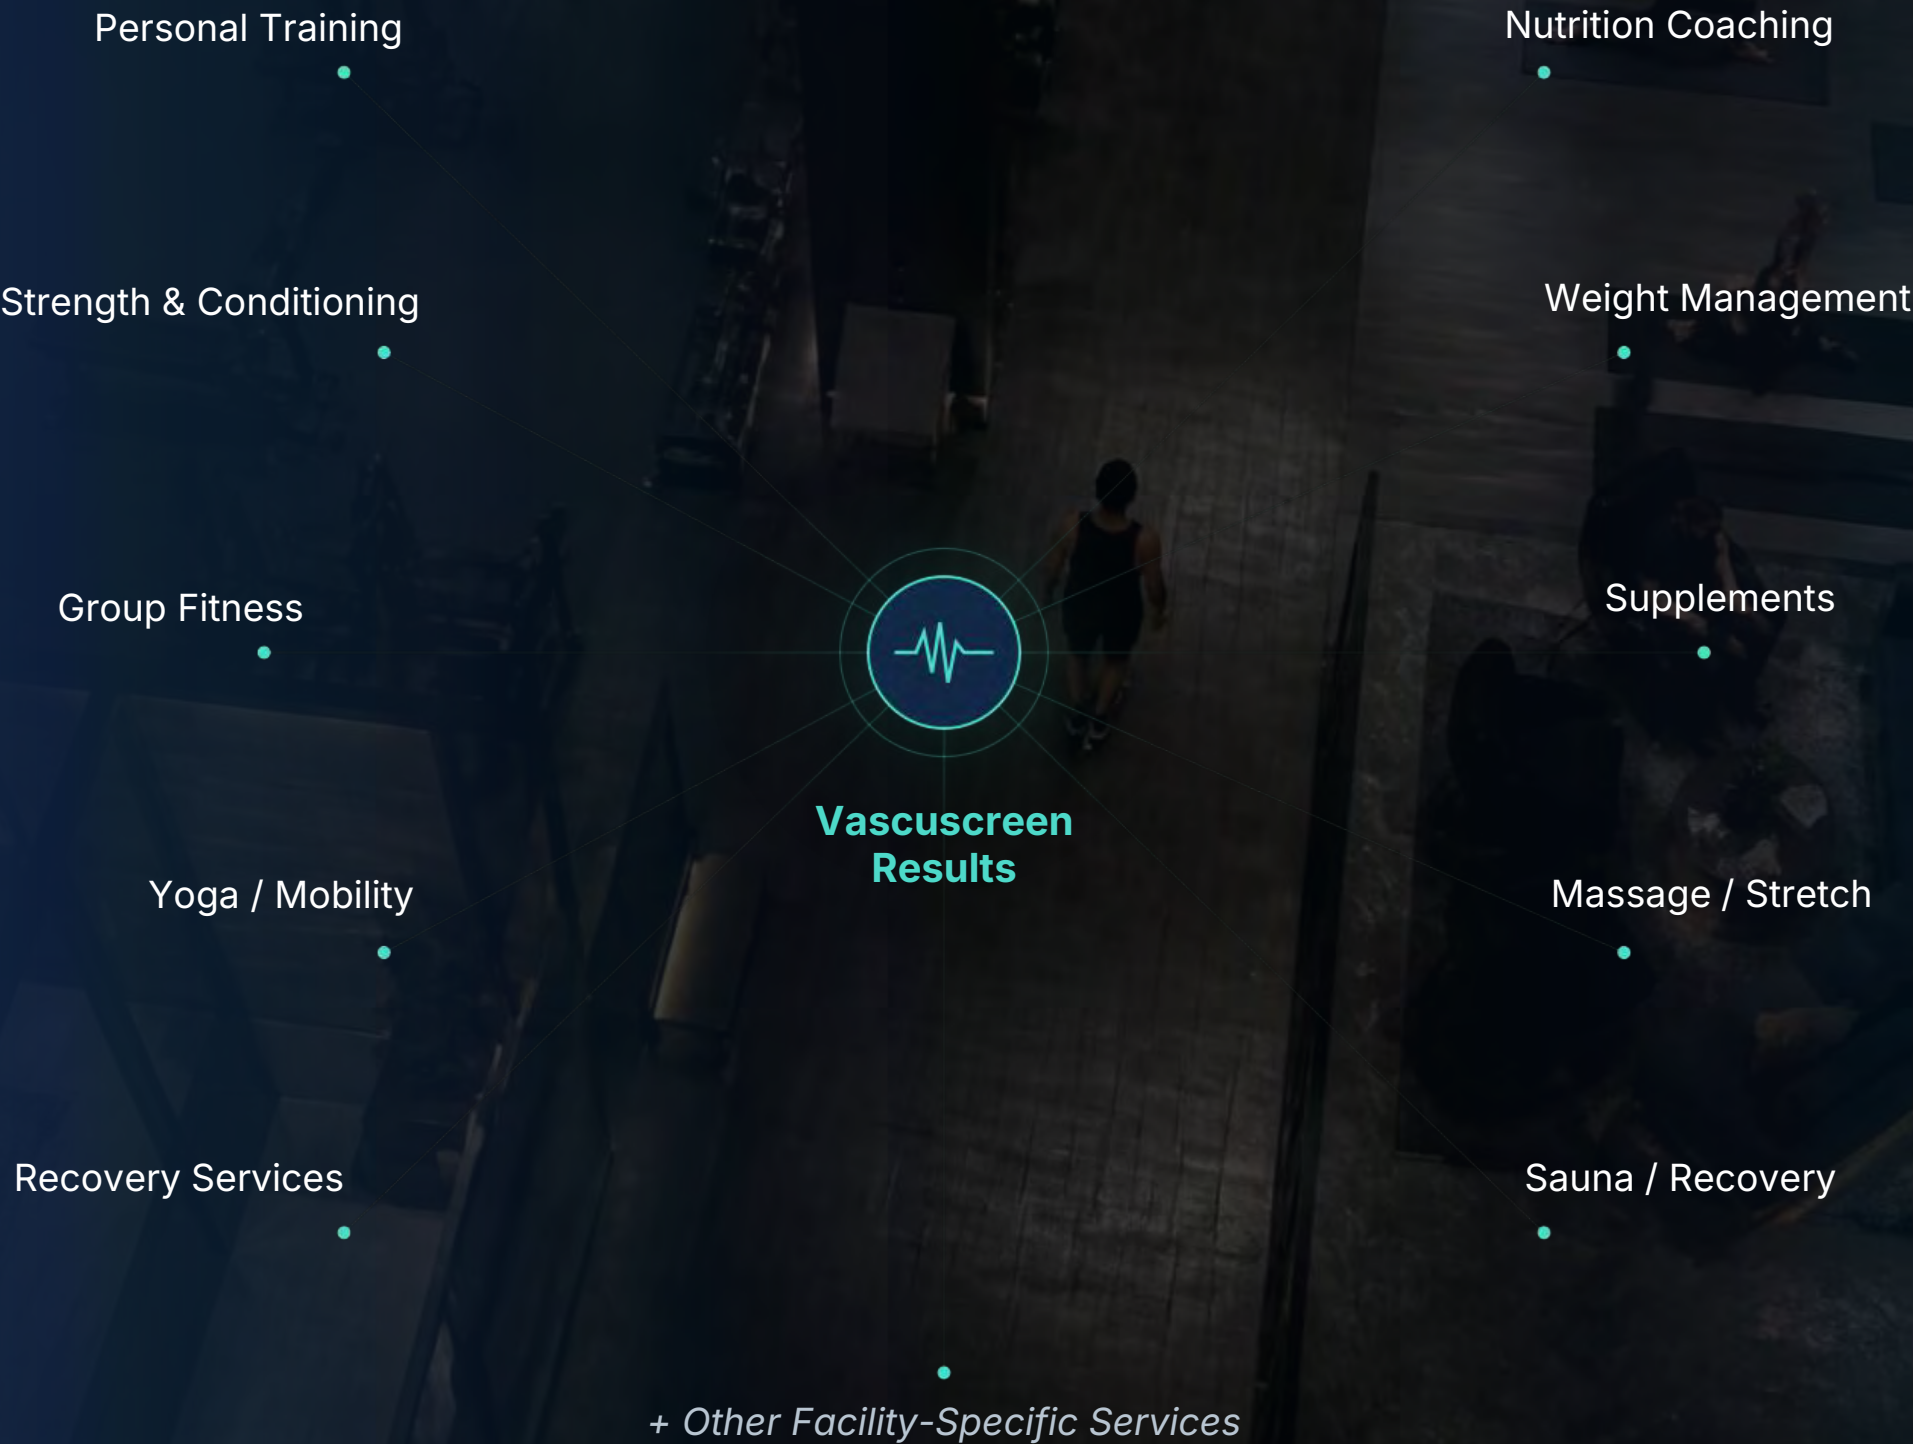

Vascuscreen wellness insights and AI-generated information are intended to support wellness education and informed conversations — not a substitute for medical diagnosis, treatment or professional medical advice.

Personalized to Your Facility

Your services. Their wellness data. *One connected experience.*

Before launch, Vascuscreen can build a customized facility knowledge base around the fitness and wellness services your location actually offers.

When appropriate, the participant's wellness information can help support personalized wellness education around relevant lifestyle, fitness and wellness offerings available at the location.

More Than an Assessment

One Vascuscreen day. *Multiple revenue opportunities.*

01 —

Assessment Revenue

The fitness center earns revenue from completed Vascuscreen assessments. Compensation is structured based on program participation and whether the facility provides on-site personnel.

02 —

Downstream Wellness Revenue

Creates data driven additional opportunities for personal training, classes, recovery, nutrition, supplements, wellness services and other facility offerings.

03 —

New Customer Acquisition

Vascuscreen can market screening events locally — bringing health-conscious consumers into the facility who may not currently be members.

Revenue today. Engagement tomorrow. *New customers for the future.*

Local Customer Acquisition

We don't just screen your members.
We help bring new people through your doors.

Vascuscreen can support local marketing around scheduled screening days to generate awareness and attract health-conscious consumers from the surrounding community.

Your Existing Audience

- Members
- Personal-training clients
- Class participants
- Wellness clients
- Member referrals

Local Vascuscreen Audience

- Health-conscious adults
- Fitness enthusiasts
- Adults focused on longevity
- Local professionals
- Community organizations
- Local employers

Vascuscreen Wellness Day

A live screening event inside your facility.

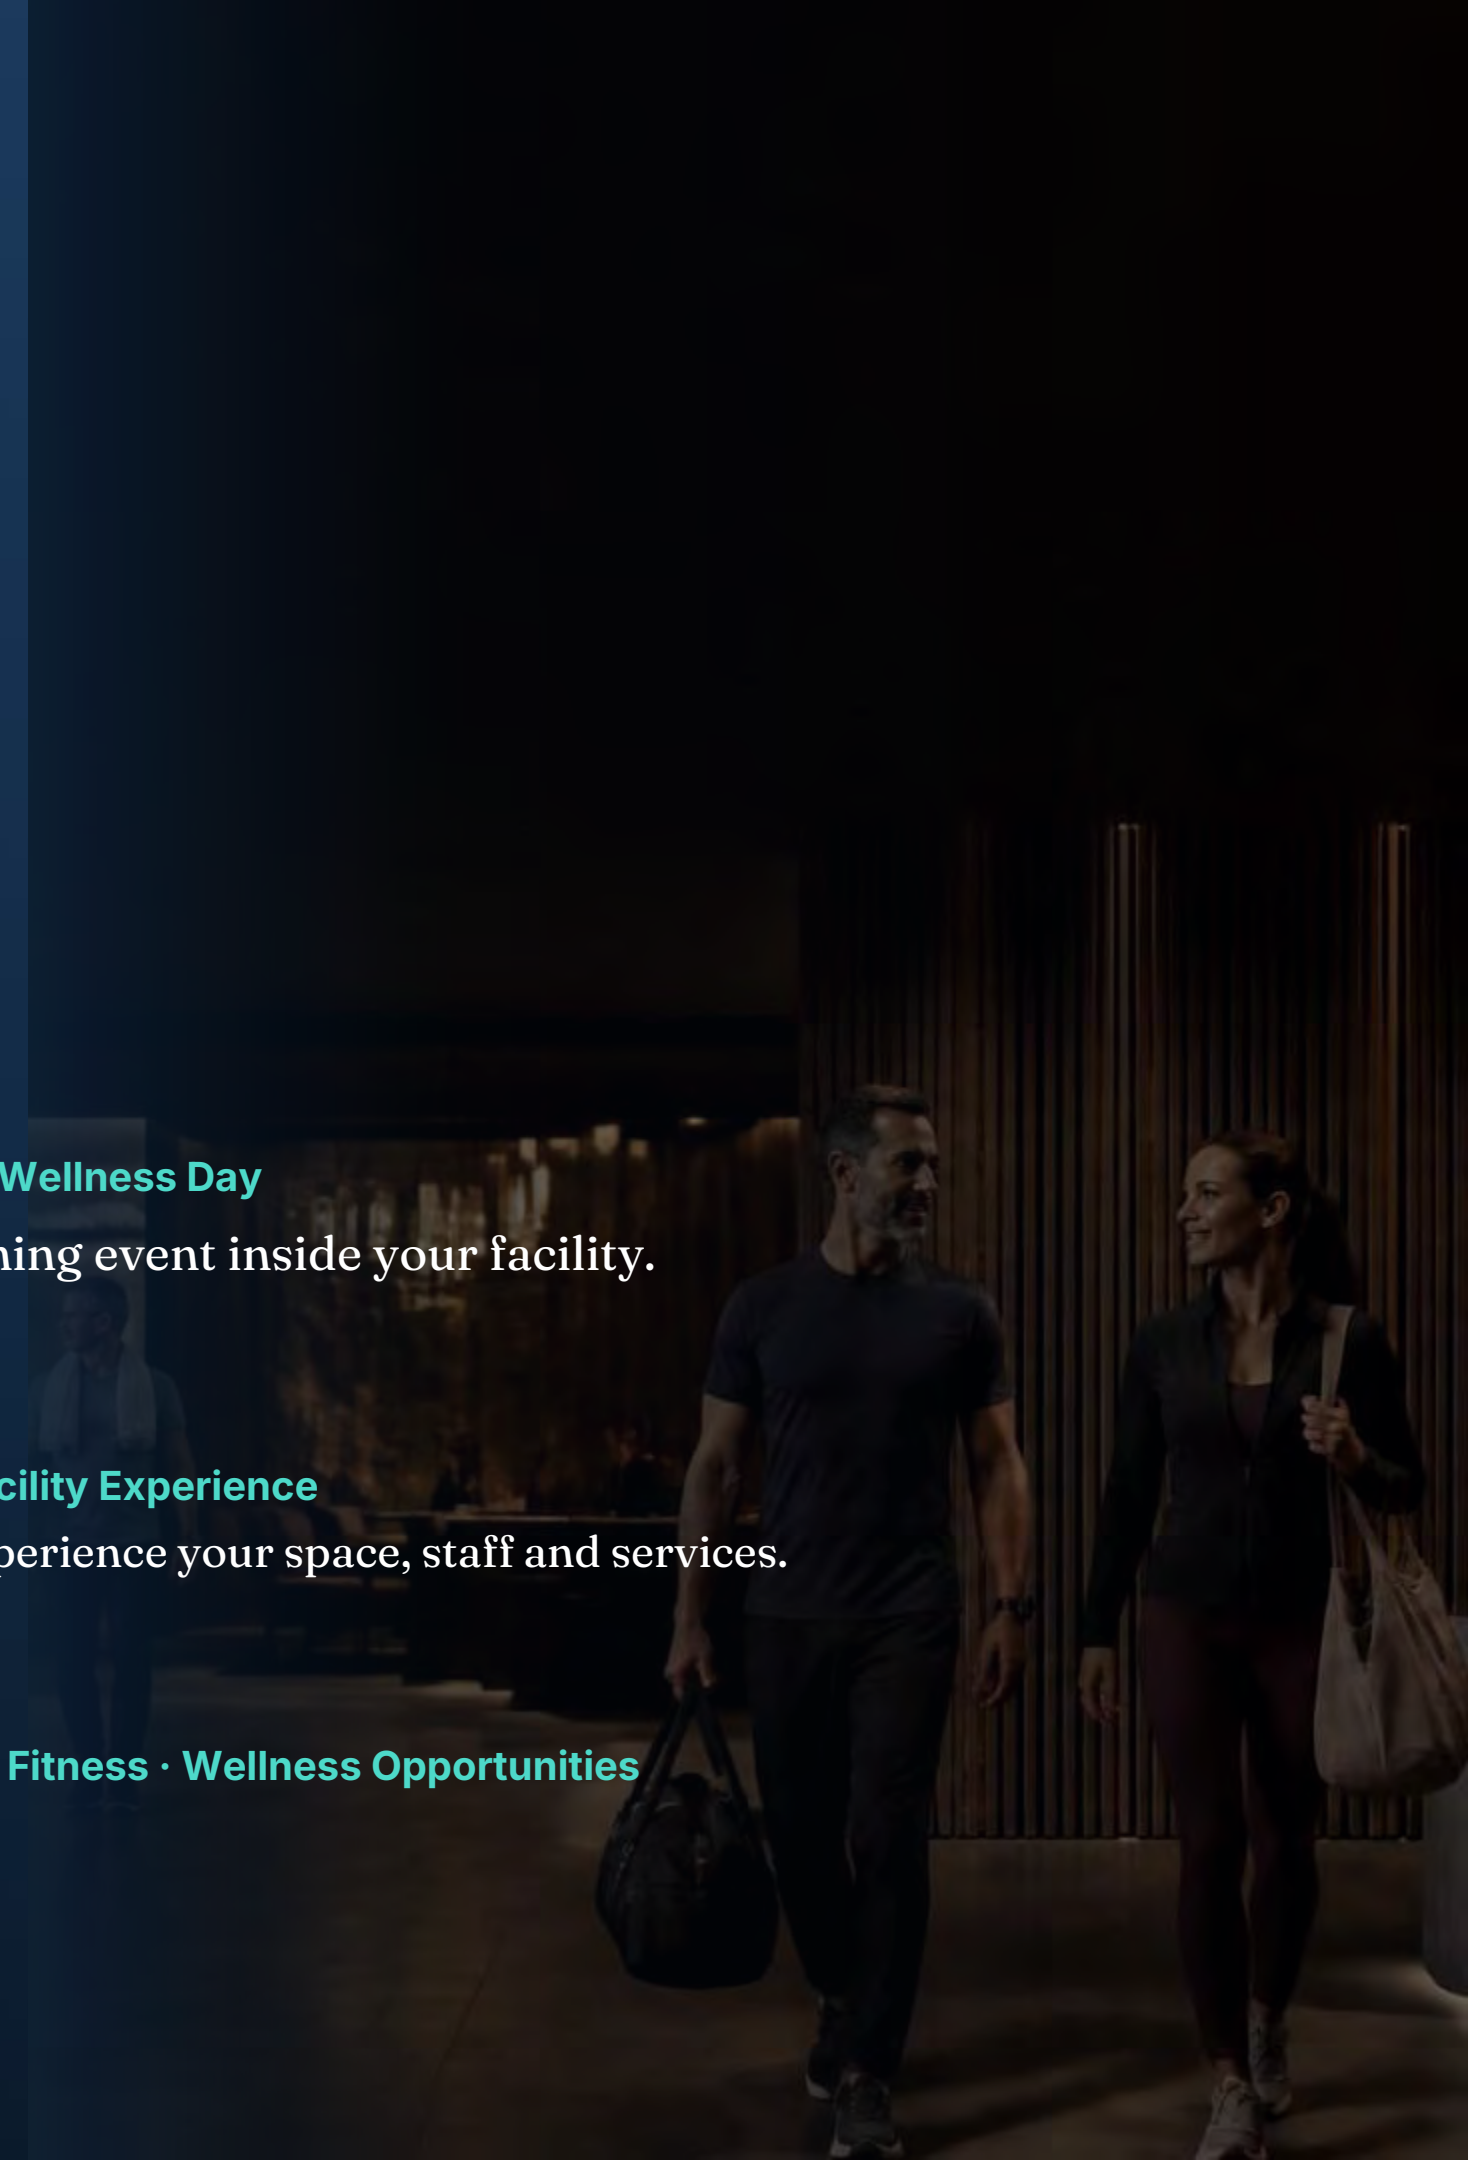

First-Hand Facility Experience

Prospects experience your space, staff and services.

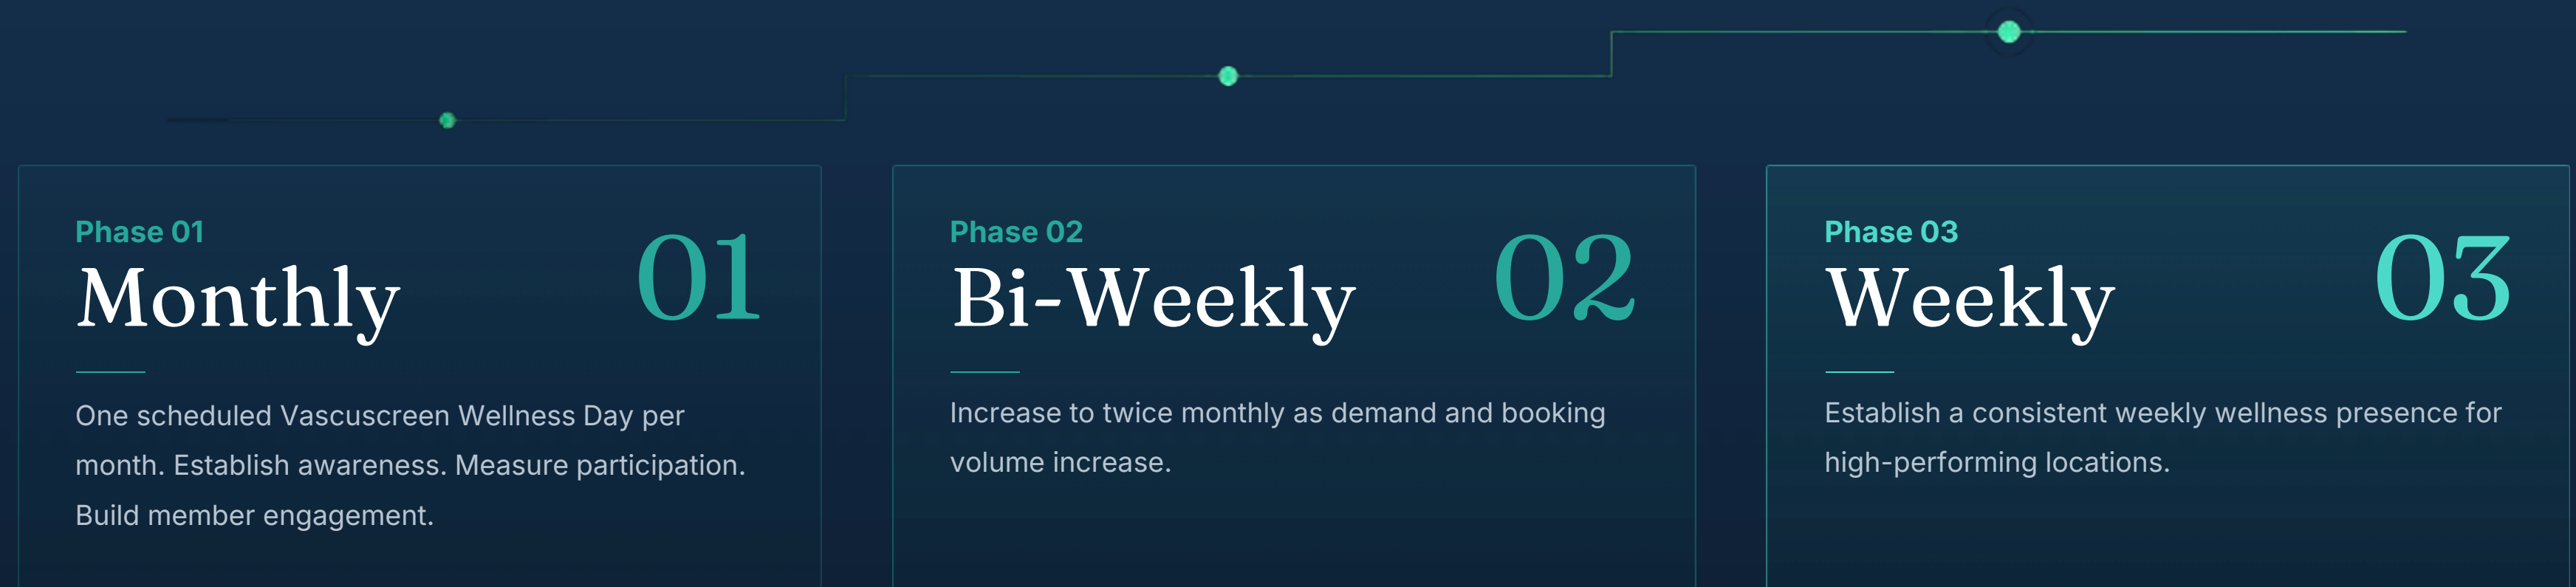

Membership · Fitness · Wellness Opportunities

The assessment becomes a new front door to your business.

Start monthly.

Grow as participation grows.

No need to overbuild on day one. *The program expands based on actual demand.*

Scheduling can be adapted to the needs, traffic patterns and participation levels of each facility.

Designed to Be Easy

New wellness experience. *No equipment investment.*

\$0*

Program cost to the fitness center*

Fitness Center Provides

- Appropriate on-site space
- Member communication
- Optional facility employee
- Facility program knowledge
- Joint Marketing Opportunities to Members

Vascuscreen Provides

- Screening system technology · Program setup ·
- Operational support · Training ·
- Scheduling · Local marketing ·
- Participant experience

We bring the platform. You provide the place. Together, we create the experience.

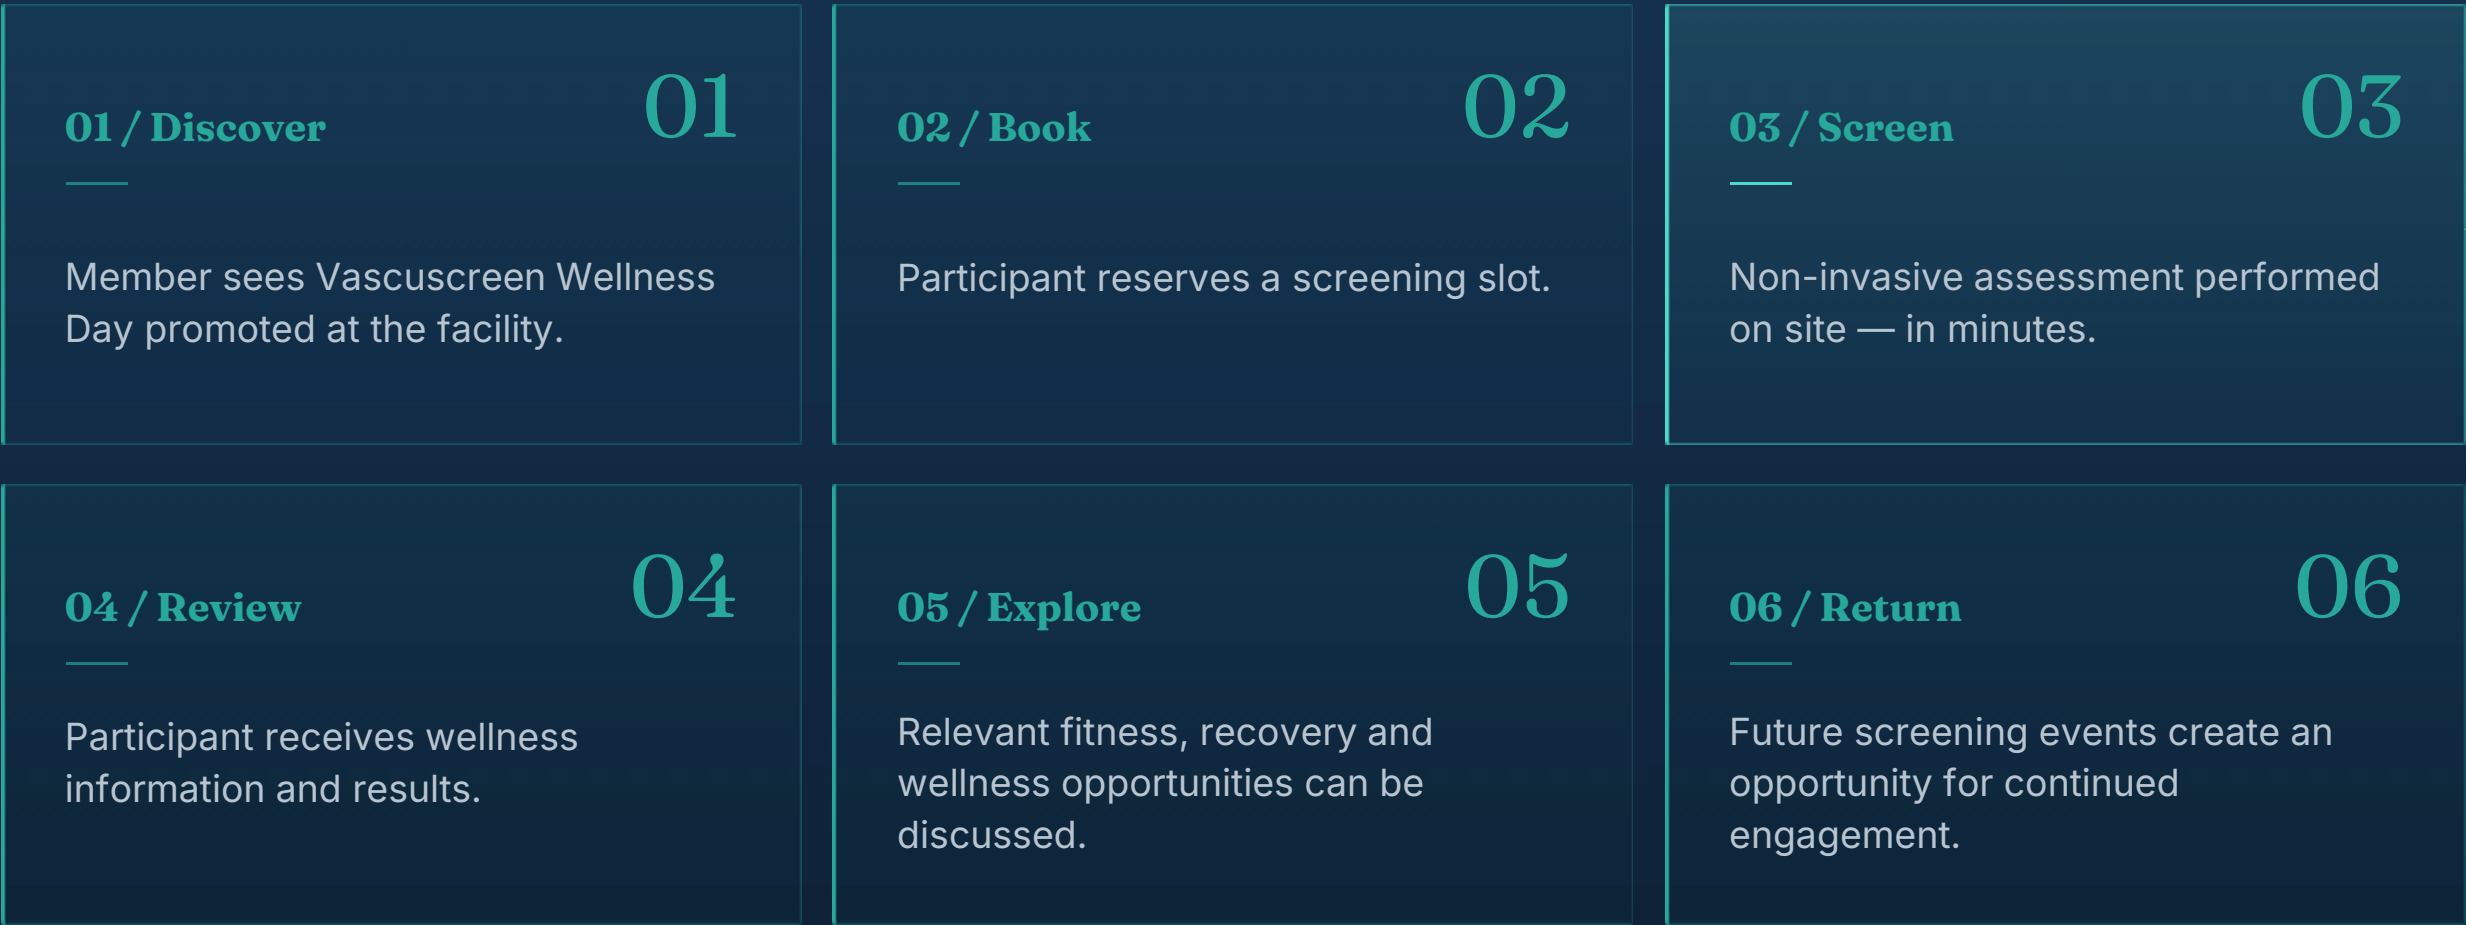

Screening
Technology

On-Site
Platform

*Final operational and revenue-sharing structure established in partnership agreement.

From workout floor to *wellness intelligence.*

A premium wellness experience designed to fit naturally into the fitness environment.

The Wellness Flywheel

Measure.
Engage.
Improve.
Repeat.

Data creates the conversation.

Your facility provides the action.

Make wellness *measurable*.

01

New Revenue

Earn revenue from completed assessments.

02

More Member Engagement

Create another reason for members to interact with the facility.

03

Personalized Wellness

Connect wellness insights with relevant fitness and lifestyle offerings.

04

Increased Service Utilization

Additional awareness of training, classes, recovery, nutrition and wellness services.

05

New Prospects

Bring health-conscious consumers from the surrounding community into the facility.

06

Competitive Differentiation

Position the facility at the intersection of fitness, preventive wellness and longevity.

This isn't another amenity. *It's a new layer of intelligence across the member experience.*

*People used to exercise
because they wanted to look better.*

Today, they train to

**Feel better. Perform better.
Recover better. Age better.**

*Vascuscreen helps make that journey **measurable**.*

One location. One day. *One new wellness experience.*

01 — Build

Review your services, programs, classes, recovery options and wellness products. Build the customized facility knowledge base.

02 — Launch

Schedule the first monthly Vascuscreen Wellness Day. Promote the event to members and the local community.

03 — Scale

Review participation and engagement. Move to bi-weekly or weekly events when volume supports expansion.

Next generation health intelligence
is coming to fitness centers.

Start transforming client health data into *personalized actions.*
